Paragon, Sebas Game Results In 0-0 Score

Oceanside Eleven Gets To Glen Cove 2-Yard Mark

The Long Island Paragon, fresh from a 6 to 2 victory over the Hicksville A. A. last week, found unexpected resistance in a powerful Olen Cove Sebas eleven at Glen Cove on Sunday afternoon, for when the final whistle blew, neither team had scored and the game ended a scoreless tie, the same as the last season's game between the same two teams.

the Sebas secondary to the two-yard line, where he was dropped by Al Mallesi, that put the Paragon in position to score in the final few moments. However, the Sebas held and the Paragon threat was ended. The Sebas flashed their bid for a score early in the first quarter, when they advanced as far as the twelve yard line.

Skidmore Plan To Aid Injured Is Announced

Nassau Police Chief Answers Appeal of William Loeb, Jr.

A plan to provide persons injured on Nassau highways with first aid and hospitalization as soon as possible and to cut red tape to a minimum was announced this week by Chief William W. Skidmore of the Nassau County Police in a letter to William Loeb, Jr., of Mill Neck.

Chief Skidmore's plan was announced in an exchange of letters the first of which was written last week by Mr. Loeb in an attempt to put an end to delays, after accidents in removing injured persons to hospitals.

The Chief's letter: Dear Mr. Loeb: I received this morning your very interesting letter of the 25th inst. and thank you for calling my attention to some of the experiences you have met with on the highways.

I think that within a very short time the matter of ambulance service will be properly adjusted so there will be no occasion for any great delay at the scene of an accident. I have very recently prepared a plan which has been submitted to the four hospitals within the County and St. Joseph's Hospital in Far Rockaway. This plan is to divide the County into zones or sectors and allot a certain sector to each of the five hospitals. A request for ambulance service must go through the police department within a city or village, or the County Police Precinct, to Police Headquarters, where the operator will immediately notify the hospital in which sector the accident has happened to provide ambulance service. These hospitals will be connected with Police Headquarters by a direct telephone line. If, when the hospital is called, information is received by the operator that the ambulance is out, the next nearest hospital will be requested to provide this ambulance service.

The matter of the Fire Department ambulances is just another problem that will have to be met and approached with a great deal of caution. Much can be said both for and against this practice. Only last Thursday at our Police Conference in Mineola, this matter was brought up by the Chief of Police and there was some favorable and some unfavorable comment upon some of this ambulance service. It seems to be the consensus of opinion that it is a dangerous practice to remove an injured person from the highway unless some one is present who had a fair knowledge of first aid. We have had first aid classes in our department, and more than 181 members of this Department have received their diplomas from the National American Red Cross as competent to handle first aid cases. We are planning to continue this until each and every man in the department has been given an opportunity to receive such a diploma.

We will be glad to receive your comments at any time and will always give them our thought and consideration. Very truly yours, ABRAM W. SKIDMORE, Chief of Police.

SPENDING MILLIONS for public convenience

UNDER the state law requiring railroads to pay 50 per cent of the cost, the Long Island Rail Road has spent to date \$36,000,000 of its own money to eliminate 356 grade crossings.

Yet its large expenditures for grade crossing eliminations do not bring in any additional revenue to the Rail Road. Rather, its property assessments are raised and the Rail Road pays large increases in taxes as a result.

A concrete example of the unfairness of this situation is shown by the fact that the Rail Road now pays extra taxes of \$28,000 a year due to increased assessments at Valley Stream where 8 grade crossings were recently eliminated. The Rail Road's share of the cost of this job was \$1,369,707.20. There are 1236 commuters from Valley Stream to New York and Brooklyn. Under the new fare schedule, it would take the total of their commutation fares for the next seven years to pay for the Rail Road's share of this improvement.

The cost of grade crossing elimination and other increasing basic costs, such as taxes, materials and wages, are vital factors in the Long Island's need for increased revenue. In view of the fact that commuter travel accounts for the largest proportion of the Rail Road's revenue ... an increase in commutation fares is sought.
